EDUCATION

National University of Singapore

Jan 2023 - Dec 2027

Bachelor of Computing in Computer Science

- Relevant Coursework: Parallel Computing, Computer Network, Computer Security, Operating System, Artificial Intelligence, Algorithms, Software Engineering
- Focus Areas: Parallel Computing, Networking and Distributed Systems

PROJECTS

Spotify Lyrics Application | React.js, Rust, Role: Full Stack

May 2024 - Jul 2024

- Utilised React as frontend framework and optimised user interface with TailwindCSS for a responsive and modern design.
- Leveraged Tauri as backend framework, integrating actix-web and reqwest to efficiently manage Spotify and lyrics API requests.
- Implemented functionality to display lyrics of currently playing song on Spotify, even when song's lyrics are not available on Spotify.
- Developed a desktop application can sync with user's currently playing song on Spotify and displays lyrics. Users can choose to save lyrics or adjust display speed to match song's tempo.

Web Forum Application for CVWO 2024 Interview | React.js, Role: Full Stack

Nov 2023 - Jan 2024

- Utilised React as frontend framework and Gin as backend framework. Implemented RESTful APIs to facilitate seamless communication between frontend, backend services, and database.
- Developed a web forum with user authentication, enabling users to manage own threads securely.
- Implemented features for adding, deleting, updating, and viewing threads, along with ability to share, and comment on specific posts.
- Deployed project on Heroku using Docker, ensuring reliable accessibility and performance.

EXPERIENCE

Source Academy (Remote), Backend Engineer

Jun 2025 - Jul 2025

- Enhanced Source Academy's logging infrastructure by migrating from basic console logging to a centralised and scalable AWS CloudWatch system for improved monitoring and reliability.
- Created a flexible logging system using Elixir's built-in logger backend library, enabling functionality enhancements without modifying original codebase and allowing seamless extension to other logging drivers.
- Built a robust logging system allows users to flexibly configure logging formats, and implemented a resend mechanism to ensure logs are reliably delivered even when system issues occur

TECHNICAL SKILLS

Programming Languages: C++/C | Python | Java | SQL | Javascript/Typescript | Rust | Go | Elixir

Frameworks & Libraries: React, Tauri, OpenCV, PyTorch, NumPy, Tailwind CSS

Technical Skills: Network Programming, Embedded Systems (Arduino), CUDA Programming, Functional Programming, Computer Vision, Machine Learning, Cybersecurity (CTF)

Tools: Linux, Git, Docker, PostgreSQL, MongoDB

COMMUNITY SERVICE

Volunteer at Allkin AAC Pasir Ris, Assistant Group Leader

Mar 2025 - Oct 2025

- Collaborated with a team of 5 volunteers to organise weekly activities for seniors at the AAC over 13 weeks.
- Served as main host, facilitating events, addressing seniors' questions, and ensuring clear understanding of activities.
- Received highly positive feedback from both seniors and supervisors, with participants expressing strong interest in future sessions.
